3 PURPOSES AND LEGAL BASES FOR THE PROCESSING OF PERSONAL DATA

The main purpose of processing personal data is to organize and conduct the EGM in accordance with applicable law. Personal data is collected and processed to enable Bioretec's shareholders to register for the EGM and to enable the shareholders to identify themselves when registering so that Bioretec can recognize the registration and the shareholder's ownership. In addition, the data may be processed for the purpose of organizing possible votes. We can only process personal data on legal bases derived from data protection legislation.

The technical implementation of the registration system, General Meeting hall bookkeeping and possible advance voting and/or possible voting during the General Meeting is carried out by Innovatics Oy. Inderes Plc is responsible for the General Meeting service in its entirety. The shareholder register is maintained by Euroclear Finland Ltd.

Remote access to the general meeting will be provided via Inderes Oyj's virtual general meeting service on the Videosync platform, which includes video and audio connections to the EGM.

The main legal bases for processing the personal data described herein are Bioretec's legal obligations regarding the organization of the EGM and the verification of the participants' identities, in particular the obligations under the Finnish Companies Act (624/2006, as amended) to organize a General Meeting and to prepare minutes and a voting list of the General Meeting, as well as other legal obligations under applicable legislation, such as the Securities Market Act (746/2012, as amended). We may also process your personal data based on Bioretec's legitimate interests in relation to the organization and proper conduct of the EGM.

To this extent, the personal data processed in connection with the EGM includes the following personal data of the shareholders or their representatives:
